EDUCATION

University of Virginia, School of Engineering and Applied Sciences, Charlottesville, VA

BS, Major: Computer Science | Cumulative GPA: 3.63

August 2021 - May 2025

- **CERTIFICATIONS and AWARDS:** Claude 101, UVA's Deans List, Elsie Hughes Cabell Endowed Award,
- **RELEVANT COURSES:** Internet Scale Applications, HCI in Computer Science, Advanced Software Development, Intro to Cybersecurity, Software Development Essentials, Computer Systems and Organizations I and II, Data Structures and Algorithms I and II

SKILLS

Languages & Frameworks: Python, Java, JavaScript, TypeScript, React.js, Node.js, React Native

AI / Data: Codex, Claude, OpenAI API, Text Embeddings, Data Scraping

Tools & Systems: AWS, Git, SQL, Linux, Agile, Code Review

Web Technologies: REST APIs, HTTP protocols

Other: HTML, CSS, MATLAB, Logic Pro, Ableton Live

WORK EXPERIENCE

Handshake AI Fellowship | AI Model Evaluation Analyst:

October 2025 – Present

- Evaluated and ranked AI-generated outputs using a structured 1–7 scoring framework, contributing to reward model training and improved response quality
- Analyzed outputs across computer science domains to assess correctness, reasoning quality, and identify systematic model weaknesses
- Produced detailed evaluation justifications and applied structured annotation formats to support model alignment efforts
- Assessed AI-generated image edits for instruction adherence and visual consistency, identifying issues such as lighting inconsistencies, texture mismatches, and unrealistic object placement
- Developed and reviewed domain-specific prompts to improve model behavior and output quality

Kimley-Horn | Information Technology Analyst Intern:

May – August 2024

- Reimaged 100+ laptops and provisioned 12 workstations, improving system readiness and reducing IT friction
- Streamlined domain configurations, contributing to a 40% reduction in daily IT support tickets

PROJECTS

Bill'd | Resume Optimizer Tool:

February 2026 – Present

- Built a multi-stage AI pipeline combining embedding-based semantic ranking with LLM-powered parsing and rewriting to tailor resumes to job descriptions
- Used vector embeddings to rank resume bullet relevance against target roles, improving alignment with job requirements
- Designed LLM workflows to restructure and rewrite resume content for clarity, impact, and role-specific targeting
- Developed a responsive front-end using React to provide resume previews

StyleFinder | Outfit Generator Tool:

April 2025 – Present

- Accelerated development of StyleFinder, a full-stack outfit generation platform, by leveraging Codex and Claude to prototype, debug, refactor, and ship features across React, Node.js, Express, Firebase, and Auth0
- Built personalized outfit generation logic using clothing categories, color relationships, layering rules, and style constraints, enabling users to generate outfits from uploaded wardrobe items
- Improved product reliability and UX through feedback from 10+ beta testers, identifying bugs and shipping updates across authentication, image uploads, saved fits, and outfit generation flows
- Reduced media-handling friction by implementing HEIC conversion and image compression for user-uploaded clothing images

LeetCode Recommender | Personal AI Tool:

September 2025

- Built a Python-based recommendation system using OpenAI embeddings and the LeetCode API
- Generated 2,000+ vectorized problem representations to deliver personalized practice recommendations

Link Manager | Personal Chrome Extension:

May 2025

- Developed a Chrome extension using React and TypeScript with Chrome Storage APIs for persistent data management
- Achieved 800+ impressions, 40+ installs, and 18 weekly active users

Advanced Software Development | Whistle-blower Application:

January – May 2024

- Collaborated in a team of four to build a Django-based web application with PostgreSQL and Heroku deployment
- Designed features addressing food insecurity and personal care concerns

LEADERSHIP/PROFESSIONAL/SERVICE

The Apostolic Church, Glorious Vision | Musician, Producer, Sound Engineer & Instructor

January 2022 – Present

- Engineered sound for 20 live worship services and coordinated 6 performance opportunities, enhancing the musical experience for an average audience of 110 attendees.
- Leveraged Logic Pro X and Ableton Live to create over 50 high-quality audio productions.

Yahweh Night Ministries | Music Director

September 2021-May 2025

- Served as Music Director, leading a band and arranging music to showcase diverse cultural worship styles.

National Society of Black Engineers (NSBE) | Senator & Communications

June 2022-May 2024

- Served as Senator, and on the Communications Team and Marketing Committee, marketing and promoting events

One-Way (Black Campus Ministry) | Men's Leader

September 2021-May 2024

- Men's Family Group Leader and Praise Team Musician, leading scripture studies and serving as music director.
